BASICS OF A GOOD ROAD

DESCRIPTION:
This workshop concerns what makes a good road including issues of safety, ease of maintenance, the right materials and the right system for keeping the signs, markings, pavement, base, shoulders, bridges, culverts and ditches in proper condition. Some of the areas to be covered are:
• Design Features
• Materials
• Compaction
• Paving
• Traffic Considerations
• Soil

OBJECTIVES:
Participants will learn:
• What a good road means
• The three most important considerations in a good road
• Why a management system is important and cost effective
• What can be done with little money

TARGET AUDIENCE:
Anyone with design, construction, safety or maintenance responsibilities.

INSTRUCTOR:
David Grouchy
David Grouchy has worked as an environmental and civil engineer, land and hydrographic surveyor for private firms, construction companies, cities, counties, state and federal government. He was formerly Director of the Louisiana Local Technical Assistance Program.

REGISTRATION PROCEDURE:
Please contact Gail Ikeda at (808) 956-8367, (808) 956-8851 (FAX) or gail@eng.hawaii.edu by Friday, September 2, 2005.

September 14, 2005
